

FRIDA

Frida LAB 2

Objective

In this challenge, the application verifies whether a specific **String** matches the expected value before revealing the flag.

Instead of modifying the APK, we'll use **Frida** to hook the method and return the correct string at runtime.

Install the APK

Install the application on your rooted Android device or emulator.

```
adb install FridaLab.apk
```

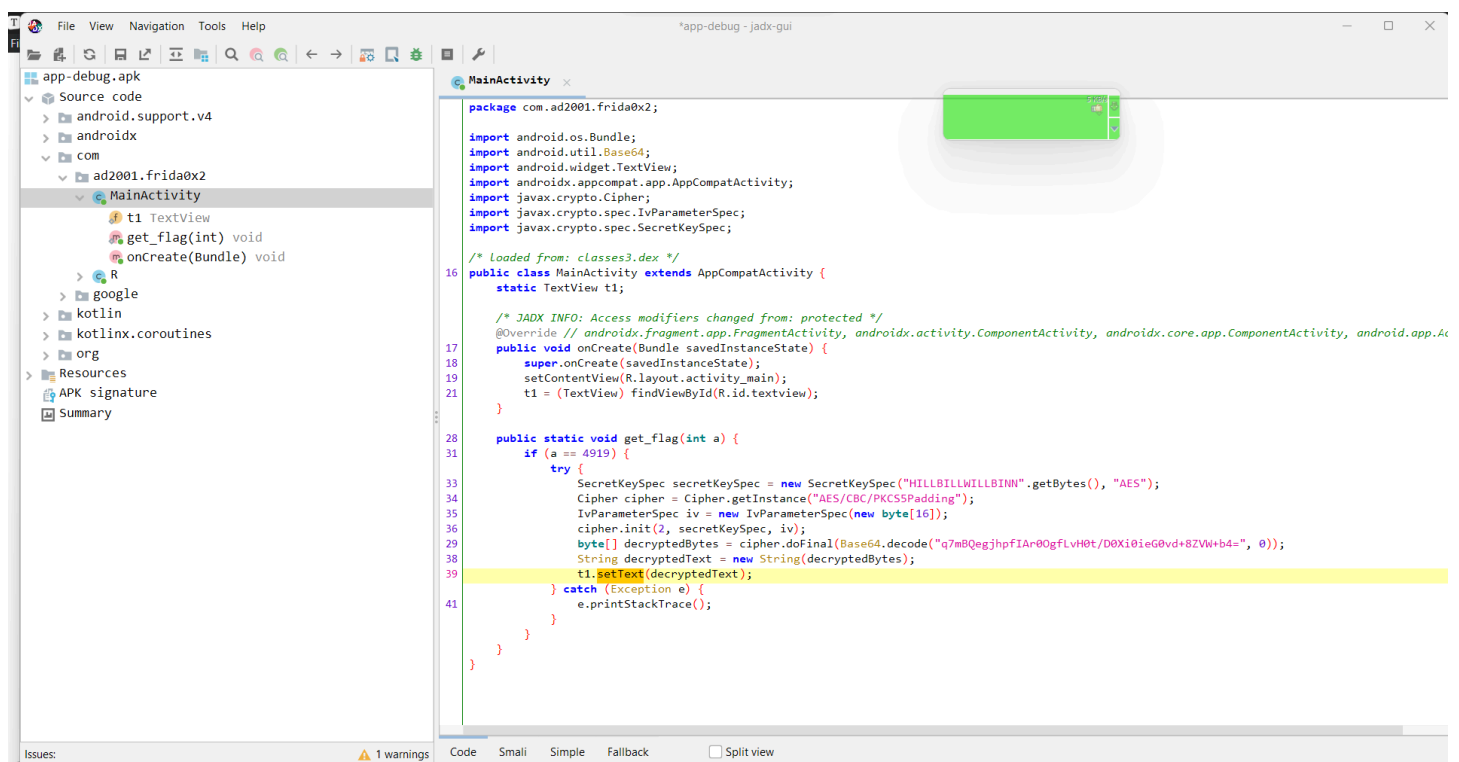

Launch the Application

Decompile the APK

Open the APK in JADX.

```
jadx-gui FridaLab.apk
```

Browse the source code.

```
