

FRIDA

Frida LAB 4

Objective

In Challenge 0x4, the application checks the value of a private member variable instead of calling a method. Initially, this variable contains an incorrect value, preventing the challenge from being completed.

Install the APK

Install the application on your rooted Android device or emulator.

adb install FridaLab.apk

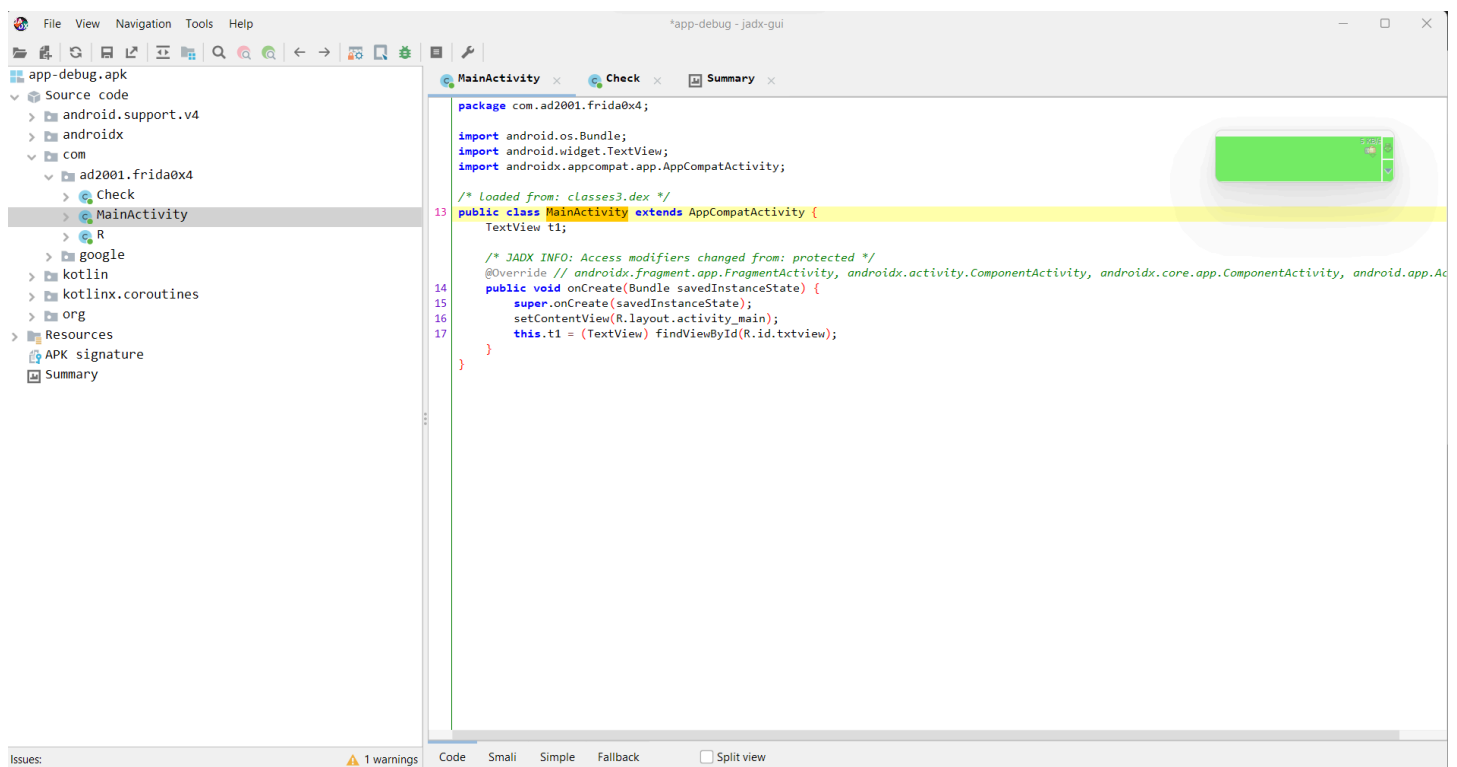

Launch the Application

Decompile the APK

Open the APK in JADX.

jadx-gui FridaLab.apk

Browse the source code.

(kali@kali)~/Downloads$ adb install Challenge\ 0+8.apk
```

Write the Frida Script

Create a file.

```
kali@kali: ~/Downloads
GNU nano 9.0
lab4.js
java.perform(function () {
    console.log("[*] Script Loaded");

    var Check = Java.use("com.ad2001.frida0+4.Check");
    var obj = Check.$new();
    var flag = obj.get_flag(1337);

    console.log("[+] FLAG: " + flag);
});
