

# FRIDA

## Frida LAB 5

### Objective

In Challenge 0x5, the application validates a private static variable rather than an instance variable or a method return value.

Since the variable is static, it belongs to the class itself rather than an object instance. The goal is to modify this static field at runtime using Frida so that the validation succeeds.

### Install the APK

Install the application on your rooted Android device or emulator.

```
adb install FridaLab.apk
```

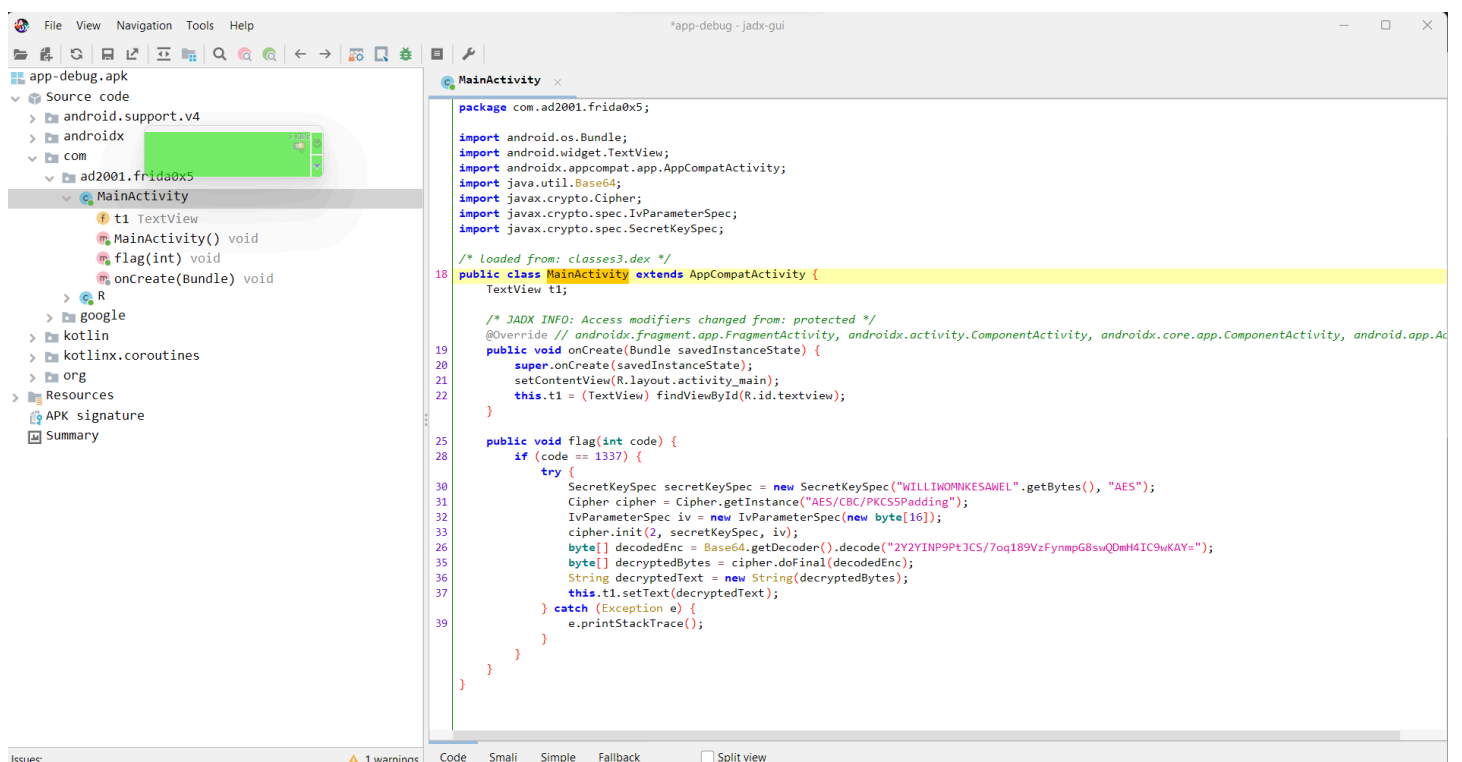

### Launch the Application

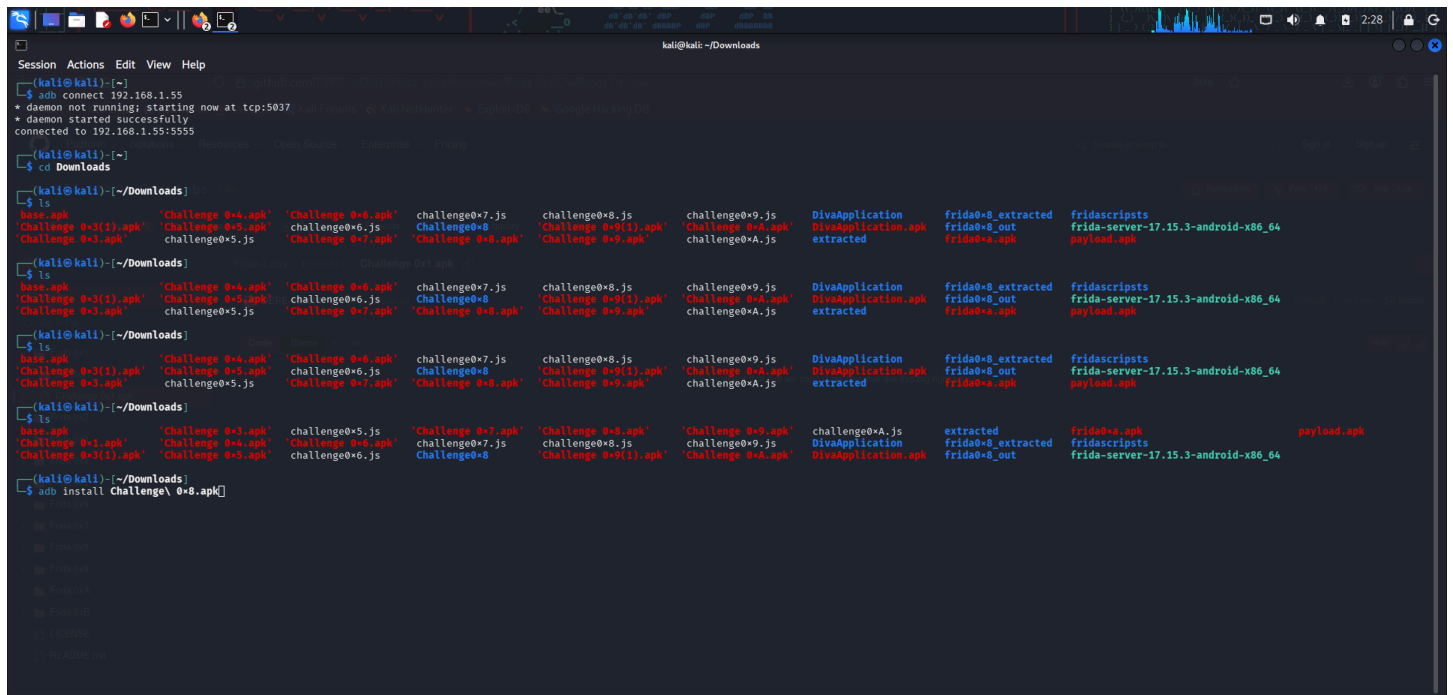

### Decompile the APK

Open the APK in JADX.

```
jadx-gui FridaLab.apk
```

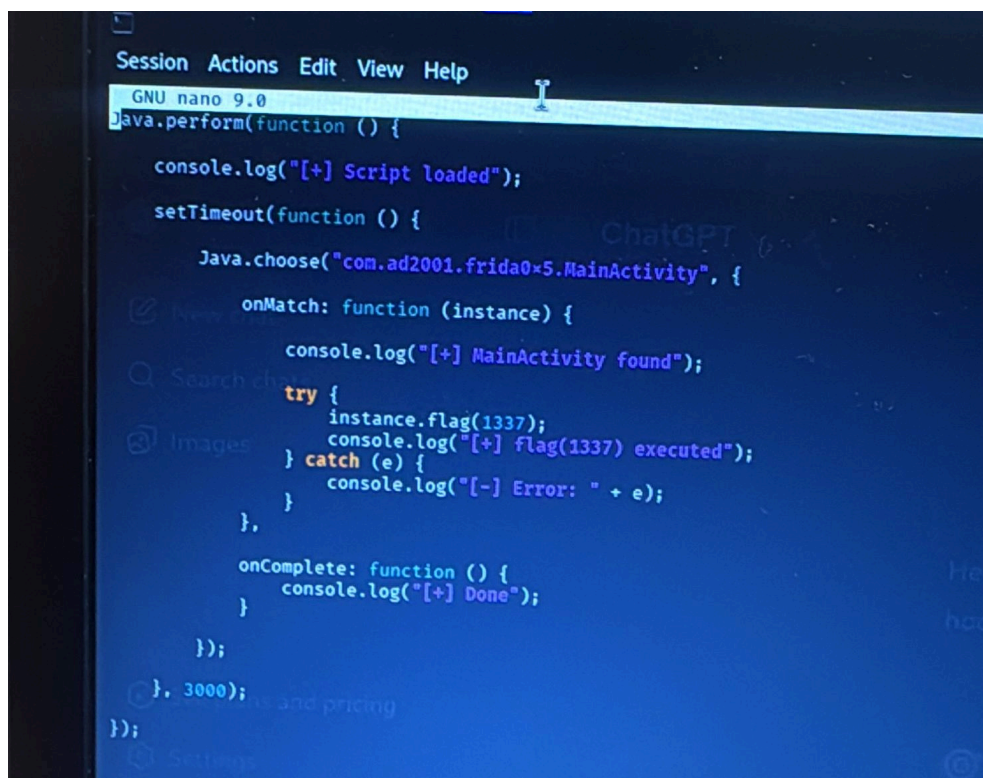

Browse the source code.

## Write the Frida Script

Create a file.

D:\Downlaods> adb shell

generic\_x86:/ # cd /data/local

local.prop local/

generic\_x86:/ # cd /data/local/tmp/

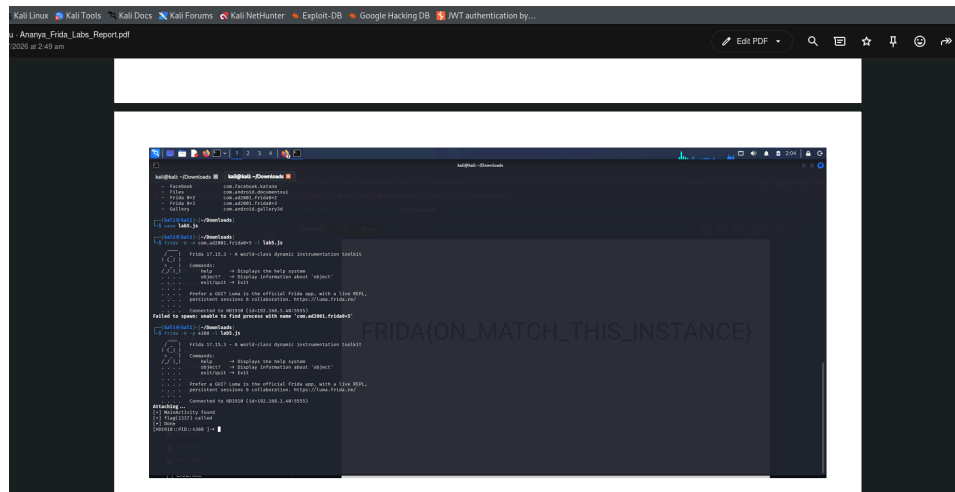

generic\_x86:/data/local/tmp # ls

generic\_x86:./frida

## Run Frida

Start the application with Frida.

frida -U -f uk.rossmarks.fridalab -l challenge5.js

Final output look likes :
